<b>Complexity:</b>			
<b>Subject:</b>	Make Ctrl-Shift+/- do font resizing		
<b>Description:</b>	<p>The keyboard commands Ctrl-Shift+/- resize the font in Chromium, Konsole and some PDF viewers. It would be nice if Smuxi supported it too. While this is more important in a web browser, which can receive pages with fonts in arbitrary sizes, it would be at least modestly useful in an IRC client.</p> <p>Currently, changing the font is a bit of a business. See, for example, <a href="http://unix.stackexchange.com/q/151955/4671">http://unix.stackexchange.com/q/151955/4671</a></p> <p>Regards, Faheem</p>
