Updated:	12/24/2014	Due date:	
Complexity:			
Found in Version:			
Subject:	Should not highlight conversations that have been already replied to		
Description:	<p>Steps to reproduce:</p> <ol style="list-style-type: none">1. Connect your smuxi-server to facebook.2. Disconnect your smuxi client.3. Some friend in facebook tells you something, i.e.: "want to have a beer today?"4. (Let's say you're travelling, so you don't have easy access to your smuxi client, so...) you connect to facebook.com/ and reply to your friend from there.5. [Repeat steps 1-4 for N number of friends. The higher N is, the more annoying this bug is.]6. (After some days, you're back from travelling, so...) you launch your smuxi client. <p>Current results:</p> <p>There are N highlighted conversations.</p> <p>Expected results:</p> <p>There should be no highlighted conversations in the facebook server tree, because you have replied to all of them (if you reply to a conversation, smuxi should consider all the past messages as read.)</p>		

History

Win! According to this (https://www.libreoffice.org/bugzilla/show_bug.cgi?id=41417), facebook delivers the user's own messages via IQ packets.
