Subject:	smuxi-server needs to marshal non-Smuxi and non-runtime (System.*) exceptions			

Description:	A smuxi-server can't expect the frontends to know "internal" (libraries used by engines) types when they are thrown as an exception. This leads to errors like this:
	
	<pre>
	13:24:51 Command 'reply' failed. Reason: The constructor to deserialize an object of type Twitterizer.TwitterizerException was not found.
	</pre>
	
	This issue would also go away with a REST API, but that also needs useful exception passing.
