Subject:	Connect users to their networks when smuxi-server (remote engine) starts		
Description:	Currently connections are established after a frontend connects for the first time. Asked a few times on #smuxi, so it should be there. Quote: <xombiemp> how can I get smuxi to connect when the service starts? Right now I have to launch the client for it to connect.

Engine(-IRC), Frontend-*: automatically start smuxi-server sessions (closes: #1067)

Immediately connect to auto-connect servers and execute on-startup commands when
smuxi-server (and local) sessions are initialized. This way the user will be
less offline, as a frontend is not required to connect first. The gap can be
huge if a smuxi-server crashes for example.
