

Smuxi - Task # 1070: Replace Mono's System.Security library with something better

Status:	New	Priority:	Normal
Author:	Mirco Bauer	Category:	Engine
Created:	06/14/2015	Assigned to:	Mirco Bauer
Updated:	01/09/2017	Due date:	
Complexity:	High		
Subject:	Replace Mono's System.Security library with something better		
Description:	<p>IRCS used by Engine-IRC and HTTPS used by Engine-Twitter, Engine-Campfire and Engine-JabbR rely on the X.509 implemented by the CLR. There are many certificate validation issues with Mono's implementation, some of them are documented with known workarounds here: https://smuxi.im/faq/troubleshooting/linux-tls/</p> <p>Since the .NET Core will not improve the situation with X.509 validation. It relies on the crypto library provided by the operating system, thus Smuxi should seek out into using OpenSSL, GnuTLS, PolarSSL, WolfSSL and the like.</p>		

History

As a short term workaround you can use stunnel with Smuxi to connect to SSL/TLS enabled servers, see: <https://smuxi.im/faq/usage/stunnel/>
