

Smuxi Issues [FROZEN ARCHIVE] - Bug # 1104: bitcoin pattern false positive

Status:	Closed	Priority:	Normal
Author:	Andrés G. Aragonese	Category:	Engine
Created:	06/05/2017	Assigned to:	Mirco Bauer
Updated:	06/20/2017	Due date:	
Complexity:			
Found in Version:			
Subject:	bitcoin pattern false positive		
Description:	<p>(I'm guessing this bug was introduced in https://github.com/meebey/smuxi/commit/9469328cee27d79c00b6e89c7a4e724aa29e1816 ;))</p> <p>Steps to reproduce:</p> <ol style="list-style-type: none">Someone mention an ethereum transaction ID in a channel, e.g.: 0x5cdc7e220fd116af780e64a04392b25c1a3d1c86d1b2ca2fea821294290e0f3c <p>Current results:</p> <p>Part of the ETH-transaction ID gets underlined as a bitcoin-URI link: 392b25c1a3d1c86d1b2ca2fea82129429</p> <p>Expected results:</p> <p>Shouldn't highlight as link.</p> <p>Implementation suggestion: my guess is that we need a similar approach to what I did here: https://github.com/meebey/smuxi/commit/dd7d45f46e13a22dfacb2c57a00a2324c56328ae , since the bug I fixed there was similar (finding a message pattern inside a bigger message, when the regex should try to find delimiters).</p>
