<b>Updated:</b>	09/20/2008	<b>Due date:</b>	
<b>Subject:</b>	Export/Import preferences		
<b>Description:</b>	I find i use Smuxi on several computers and OS's and it can be a pain looking back and forth between them all so i can have the same settings, servers and channels across all those different installs.  An export/import option would be a nice addition.		

### History

Export:

<pre>

```
cp ~/.config/smuxi/smuxi-engine.ini $exported_config
```

</pre>

Import:

<pre>

```
cp $exported_config cp ~/.config/smuxi/smuxi-engine.ini
```

</pre>

If you use smuxi-server btw, all settings are stored on the server, so you dont need to keep track of setting changes.

Or do you want something else?
