Updated:	01/18/2009	**Due date:**	
Subject:	import settings of other IRC clients		
Description:	On the first start of Smuxi, it could check for common IRC clients being installed on the system and allow the user to import settings like nickname, realname, servers, auto-connect/join, etc. XChat, irssi and konversation should be supported to begin with. The detection and import code logic should be implemented in the UI-neutral Frontend library.
