

Smuxi Issues [FROZEN ARCHIVE] - Bug # 159: Cannot restore from notification icon

Status:	Closed	Priority:	Normal
Author:	Iain Lane	Category:	Frontend GNOME
Created:	03/08/2009	Assigned to:	Mirco Bauer
Updated:	08/10/2009	Due date:	
Subject:	Cannot restore from notification icon		
Description:	<p>When smuxi (0.6.3) is minimised to the notification area, I cannot left click it to restore. I have to right click and select preferences, often more than once, to get it to reappear.</p> <p>Using GNOME with metacity + metacity compositor.</p>

If the status icon was activated make sure it also restores from minimized state as not all users have a window list and thus can't see the restored but still minimized window. (closes: #159)

Ok, this issue can be reproduced when the notification icon is set to "always show" and the main window is "minimized" by doing a left click on the tray icon and then you try to restore the application with left click on the tray icon. It will restore the window but in minimized mode. Now if the user has no "Window List" applet running he will not be able to get back to the main window.
