| **Subject:** | Server Properties API | | | |
| **Description:** | Allow to check for common server properties as commonly found on IRCd servers. | | | |

## Associated revisions

**06/09/2013 07:27 PM - Ondrej HoÅ¡ek**

Add an API to fetch server properties (closes #167).

Support the RPL_ISUPPORT message, allow structured access to the information it

provides, and don't perform anything Banex/Invex-related if the server doesn't

explicitly announce support (via ISUPPORT).

Inspired by a patch written by Thomas Bruderer <apophis@apophis.ch>.

## History
