

## Smuxi - Feature # 173: whois output in current channel

<b>Status:</b>	New	<b>Priority:</b>	Normal
<b>Author:</b>	seb sch	<b>Category:</b>	Engine IRC
<b>Created:</b>	04/13/2009	<b>Assigned to:</b>	Mirco Bauer
<b>Updated:</b>	01/05/2010	<b>Due date:</b>	
<b>Complexity:</b>	Low		
<b>Subject:</b>	whois output in current channel		
<b>Description:</b>	Would be nice to have the output of whois/etc. in the current channel, so one doesnt have to switch to the corresponding server tab.

- *Category set to Engine IRC*

- *Assigned to set to Mirco Bauer*

This one is a bit tricky due the way the IRC protocol works, but should be managable using a blocking whois implementation.

#### 07/27/2009 01:08 PM - - -

This doesn't need a blocking whois implementation. Just keep track of the current open window, and add the whois result there when it arrives.

#### 01/05/2010 02:59 AM - Mirco Bauer

- *Complexity set to Low*

Actually this one is simple as if the user is on the channel then the channel-sync feature can be used to retrieve and show the whois data instead of querying the IRCd.
