Subject:	Many beeps when connecting to a smuxi-server on Windows		
Description:	When you connect to a smuxi-server on Windows every highlighted messages will beep during the sync. This is pretty annoying.

Only beep on highlights for synced chats (closes: #223)

On Linux GTK+ ignores many beep requests and only the most recent one will

be executed. On Windows though every beep call gets executed right away,

causing lots of beeping noise during a frontend sync.

- Complexity set to Low

A simple solution to this issue would be if the "beep" code would only start beeping after the chat was synced and not before that.
