Smuxi - Bug # 290: Twitter hostname and port can be configured in settings

Status:	Closed	**Priority:**	Normal
Author:	Mirco Bauer	**Category:**	Frontend GNOME
Created:	01/13/2010	**Assigned to:**	Mirco Bauer
Updated:	01/23/2010	**Due date:**	
Complexity:	Low		
Subject:	Twitter hostname and port can be configured in settings		
Description:	With Preferences -> Servers -> Add you can add your Twitter account but you can also enter the hostname, port and network field. Those fields which should be disabled for Twitter, as they don't make sense (and are not supported). If you go via Server -> Add this issue is not happening.

Refactored QuickConnectDialog and ServerView

- Removed lots of duplicate code by merging ServerView (glade based) and
  QuickConnectDialog (stetic based) into ServerWidget.
- Replaced ServerView with ServerDialog.
- If Twitter is selected as protocol, you can no longer enter host or port.
  (closes: #290)
