Subject:	downloads stops and restarts		
Description:	i have in the latest code from svn i have encounter this specific		
	weird behavior, it starts to download for some seconds or minutes		
	and next stops and restarts any idea why happens this ?		

History

What revision of svn specifically are you using? I made a change a few weeks ago which resulted in this behaviour, but I've backed that change out.

ithink the

Revision: 149321

 because i re downloaded the code at 12/1/20010 around that day :P

- Status changed from New to Resolved

This has probably been fixed in git master. There were a few issues re-using the message buffers that could've caused this.
