Subject:	Add highlight window		
Description:	One of the features I miss from irssi is the highlight window. This was a text-window that aggregated all of the messages that triggered a highlight, in a format like """ 09:03 #smuxi | meeby: Hey RAOF, I fixed your Freenode bouncing bug! Try out 0.7.1! 09:10 #debian-cil | directhex: Man, RAOF rocks so hard! 09:11 #gnome-do | lamalex: RAOF, he's my hero. """
