

Smuxi Issues [FROZEN ARCHIVE] - Bug # 311: /join suddenly stops working

Status:	Closed	Priority:	Immediate
Author:	Ingo Saitz	Category:	Engine IRC
Created:	01/22/2010	Assigned to:	Mirco Bauer
Updated:	01/31/2010	Due date:	
Complexity:	Medium		
Subject:	/join suddenly stops working		
Description:	after closing a tab by clicking it with the middle mouse button (which probably was not the trigger), i could not /join any channel on all ircnets i was connected to. /reconnect did not help to fix the problem, only closing the server tab with all its channels and reopening it using quick connect from the menu. after that i could use /join again on the new server connection but still not on the old server connections. /quote join #channel worked nevertheless.

Reset the join queue when disconnecting and be verbose when the delay kicks in (closes: #311)

The /join command sometimes stopped completely working.

A netsplit -> excess flood -> rejoins -> excess flood could leave old and unfinished join attempts in _ActiveChannelJoinList behind causing the join queue to block forever.

Ok, I could track this issue down to this:

<http://git.qnetp.net/?p=smuxi.git;a=blob;f=src/Engine-IRC/Protocols/Irc/IrcProtocolManager.cs;h=e969dc314e55bb931d34b83b3f63c762b6a3d0d7;hb=HEAD#l2618>

The NAMES reply event can be raised multiple times for big channels, leaving duplicate entries in _JoinChannelList behind. The next join attempt will then believe there are still on-going joins and thus never happens.
