Subject:	Using /rejoin on an unconnected channel blocks, gives error msg		
Description:	Continuation of bug #198 (Missing dictionary on Windows):		

Description:

Continuation of bug #198 (Missing dictionary on Windows):

User gets kicked from channel while a frontend is not connected. Windows client no longer throws exception on reconnection to the engine. However, using /rejoin in the channel window causes a block (frontend freezes while joining the channel), and throws the following error message into the IRC server tab:

23:46:48 [442 (ErrorNotOnChannel) #smuxi] You're not on that channel

Block is expected but annoying (especially on connections with high latency), error message is not expected.

Smuxi version is 0.7.0.0 Windows, OS is Windows 7 Ultimate ENG (running client with normal user rights).
