

Smuxi - Bug # 332: Messages may be send to the wrong network

Status:	Closed	Priority:	Immediate
Author:	Michael Schmitt	Category:	Frontend
Created:	02/02/2010	Assigned to:	Mirco Bauer
Updated:	02/03/2010	Due date:	
Complexity:	High		
Subject:	Messages may be send to the wrong network		
Description:	With lag between frontend and engine it is most likely that messages will go to the wrong network. I talked to one in #debian.de@ircnet (irssi-proxy in between) but folks on #debian.de@oftc got the messages.

Fixed race condition when sending commands to the protocol manager (closes: #332)

Don't rely on the synced state in the FrontendManager, as that lacks behind when there a significant latency between frontend and engine (smuxi-server).

- *Category set to Frontend GNOME*
- *Target version set to 0.7.2*
- *Complexity set to High*

That's for sure a race condition related to the background thread feature introduced in #233 and the entry command queue #242 that needs to be analyzed.
