Subject:	HTML entities shown instead of actual character		
Description:	There are sometimes HTML entities shown in messages instead of their character. Smuxi needs to convert them. Here is an example message: <pre><pre> 18:48:24 <sandyarmstrong> Dear Apple, when I was using Colloquy on Space 2, and Chromium on Space 1, why would I want to switch to a Chromium window when going 1-&gt;2 ? ^^^ </pre></pre>
