Subject:	HTML entities shown instead of actual character		
Description:	There are somtimes HTML entities shown in messages instead of their character. Smuxi needs to convert		
	them. Here is an example message:		
	<pre><pre></pre></pre>		
	18:48:24 <sandyarmstrong> Dear Apple, when I was using Colloquy on Space 2, and Chromium on Space</sandyarmstrong>		
	1, why would I want to switch to a Chromium window when going 1->2?
