<b>Description:</b>	<p>I just updated smuxi from 0.7.1 to 0.7.2.1 on Windows 7. When I tried to open smuxi's preferences I've got the following exception message and smuxi crashes. I can't reproduce this issue. Could it be that you upgraded to Smuxi 0.7.2.1 while you had 0.7.1 still running and then tried to open preferences?
