

Smuxi - Feature # 421: /clear should clear the TextView, not the Buffer

Status:	New	Priority:	Normal
Author:	Jonathan Pryor	Category:	Frontend GNOME
Created:	07/28/2010	Assigned to:	Mirco Bauer
Updated:	04/17/2012	Due date:	
Complexity:			
Subject:		/clear should clear the TextView, not the Buffer	
Description:		<p>/clear should clear the view, not the buffer.</p> <p>The semantics I'm after are the same as gnome-terminal `clear` and irssi `/clear`.</p> <p>Consider gnome-terminal:</p> <pre>\$ cat some-large-file.txt. # terminal is now filled with text, prompt at bottom of window \$ clear # prompt now at top of window &lt;SHIFT+PgUP&gt; # You can now view the text that you previously cleared.</pre> <p>irssi is the ~same: after /clear, the screen contents are cleared but you can use PgUp to view the buffer.</p>

- Target version set to 0.8
I am not sure Gtk.TextView allows to scroll further than the allocated buffer but I will look into this.
