Complexity:	High		
Subject:	Using database for logging		
Description:	One of the great feature of Quassel is that everything is recorded in a database, for exemple I have currently inside my SQLite database discussion that are 6 months old. This is a great feature, I can go back in time at any moment inside my Quassel window. It would be great if Smuxi had the same feature, and adding the possibility to do some automatic cleaning (remove everything witch is more than xxx days/months/years old, cleanup everything which from channel/query xxx etc.)		

History

08/15/2010 10:37 PM - Mirco Bauer

- Category changed from Common to Engine

- Target version set to TBD

- Complexity set to High

11/21/2011 03:14 AM - Mirco Bauer

- Status changed from New to Closed

- Target version changed from TBD to 0.8.9

- % Done changed from 0 to 100

A technical preview of this feature has been added in commit:609cd5da95829d73c8bb9305d8e6af9d5dd65697
