| <b>Subject:</b>     | Smuxi keeps requesting Twitter authorization   |                     |                |
| <b>Description:</b> | <p>When adding a Twitter account to the config using the Server Manager in Settings it will ask for authorization each time you connect to Twitter. It is not remembering the authorization done before that.</p> <p>Temporarily workaround to this issue is to delete the Twitter entry from the Settings and then connect to Twitter using:</p> <pre>&lt;pre&gt;<br/>/connect twitter \$username<br/>&lt;/pre&gt;</pre> <p>After that the successful authorization will be really stored in the Smuxi config file.</p> |                     |                |
