Smuxi Issues [FROZEN ARCHIVE] - Feature # 472: Theme sensitive application icon

Status:	Closed	**Priority:**	Normal
Author:	Dag Odenhall	**Category:**	Frontend GNOME
Created:	09/06/2010	**Assigned to:**	Mirco Bauer
Updated:	12/29/2011	**Due date:**	
Complexity:	Medium		
Subject:	Theme sensitive application icon		
Description:	If a (GNOME) theme provides an application icon for Smuxi, it should be used in place of the canonical one wherever applicable.

[Frontend-GNOME] Load PNG instead of SVG images, honor GTK+ icon themes and install icons into correct places

- Only load pre-scaled PNG image files in Smuxi so the SVG pixbuf loader
  for GDK is no longer needed. (closes: #230, #304)
- Load icons using Gtk.IconTheme to honor GTK+ icon themes. (closes: #472)
- Install SVG and PNGs into correct locations as per
  GNOME Goal: Install theme-friendly icons [0]. (closes: #503)

This already works if the theme provides an icon for <code>smuxi-frontend-gnome.svg</code>. I think a best practice is to leave out the extension in the .desktop however; example from Empathy:

<pre>Icon=empathy</pre>

Screenshots: http://imgur.com/a/Id0KJ/smuxi_faenza_icons

Remaining issues: The Notification Area icon is not affected by the theme.

09/07/2010 04:21 PM - Dag Odenhall

Just realized the tab icons ignore the theme as well. Using Gtk stock icons should solve this.

<pre>
<donri> meebey: Gtk.IconTheme
<donri> meebey: bool Gtk.IconTheme.Default.HasIcon("smuxi-frontend-gnome")
<donri> meebey: Gdk.Pixbuf Gtk.IconTheme.Default.LoadIcon("smuxi-frontend-gnome", 24, 0)
<donri> if null use old loading mechanism
<donri> Not sure if that's needed to use theme icons on the tabs
<donri> Mainly because I don't know how you currently load 'em :)
</pre>
