Complexity:			
Subject:	Notifications not working		
Description:	Using Ubuntu 10.10 (Lucid) notification don't work, even though the "Always Display" option in Preferences -> Interface -> Notification is enabled. Attaching a screenshot of my current notification options. It doesn't matter if the windows is minimized or not.		

History

I forgot to mention that this is happening on the 32 bit version of Ubuntu, running a PAE kernel.

09/08/2010 05:34 PM - Jaime Diaz

It does work when window is minimized or in tray and your nick is written on the channel. But it doesn't work for any other text.

09/08/2010 05:36 PM - Jaime Diaz

I just realized that I'e said Ubuntu 10.10. My mistake, I've should said 10.4

09/08/2010 07:19 PM - Jimmie E

Custom highlight words works in Ubuntu 9.10 (karmic) 32 bit, getting notification and sound.

Smuxi version: 0.8.0.0 Git HEAD 6b927d832a28e672906d28eb22075f66d8f983e0

Does only work for highlited words?

I thought it would work ala xchat, that blinks the icon everytime there's activity on any of the channels one's in

09/08/2010 07:41 PM - Jimmie E

It only works with Highlighted words lines. You can add words in Interface -> Output. It also works with regex, "/.*/" without quotes will notify everything.

A special condition are private messages, they are always highlights per definition.

Getting a highlight or notification for _every_ channel message would be flooding :)

I do realize that. I was thinking more of a blinking tray icon if there's activity on any channel and the smuxi window is out of focus (not visible). Not sending a notification on the channels ;-)

09/09/2010 04:31 PM - Mirco Bauer

- Status changed from New to Rejected

- 1 set to invalid

Ah ok, I can see now what you mean but Smuxi is not caring about activity (group messages) as long as they are not a highlight, thus the tray icon, notifications and messaging menu are only reacting to highlights.

As this is intended behavior I am closing this report now.
