Subject:	Show realname in tooltip when hovering over a nick		
Description:	I often want to know or check the real name of somebody on IRC. Doing it manually with a WHOIS query is a bit cumbersome. It would be nice if Smuxi would display the real name in a tooltip when hovering above the someone's nick in the "Person List", and maybe also in the main chat window ? Xchat-Gnome does that, so I got used to it.

That's a good idea. I had also ideas similar to this showing available person details in a mouse over tool tips to avoid extra menu clicks.
