Post-pone this bug to 0.7.0, this issue looks simpler than it is.

The highlight get's lost for person chats because the highlight is cleared in [[GnomeUI]].SyncChat() after it was synced so re-attaching the frontend will not trigger all highlights again. The highlight needs to be reset after all chat views are synced after the intial sync. We have no hook for this currently...

- Status changed from New to Closed

- 1 set to fixed

Workaround disabled in SVN r383 thus this is fixed for now.
