Acronym help when acronyms are present	t in a message
When a user is typing a message, allow the	nem to help with indicating an acronym by using a special format or
characters. For instance use [] or maybe ^ to indicate the acronym.	
^FWIW you don't know jack	
or	
[FWIW] you don't know jack	
You could maybe even do some kind of in	tellisense off of it.
IE.	
FOR What its Worth	
Then Smuyi sends it like this for other's to	read:
Their official series it like this for other s to	reau.
12:00 <user> +FWIW+ you don't know iac</user>	k
in the second se	
FWIW has some kind of visual indicator fo	or people, like an underline or a color. Then when the
	ed acronym, it shows "For What It's Worth" in a tip box.
	Dale Ragan 10/06/2010 11/01/2010  Acronym help when acronyms are present. When a user is typing a message, allow the characters. For instance use [] or maybe and a series of the characters. For instance use [] or maybe and a series of the characters.  AFWIW you don't know jack.  Or  [FWIW] you don't know jack.  You could maybe even do some kind of interpretation of the characters.  Then Smuxi sends it like this for other's to the characters.  12:00 < user> +FWIW+ you don't know jack.
