Can you paste the crash message? If Smuxi just quits without any message please start it from a terminal using this command:

```
<pre>
smuxi-frontend-gnome
</pre>
```

Sorry, I thought smuxi would automatically send the exception.

Exception Type:

System.InvalidCastException

Exception Message:

Return value has an invalid type

Exception StackTrace:

```

Ok, so the issue is reproducible for you. Could you please join #smuxi on irc.oftc.net as I need further debug information for this issue?

#### 12/18/2010 04:20 PM - Mirco Bauer

Starting Smuxi from a terminal with the debug parameter might reveal more information:

```
<pre>
smuxi-frontend-gnome -d
</pre>
```

Make sure to not paste any passwords! Pasting the last 50 lines should be sufficient.

I wonder if this issue happens if smuxi-engine-irc is installed and used on the smuxi-server side but is missing on the smuxi-frontend-gnome side... Are you using smuxi-server?
