| <b>Subject:</b>     | continuing auto scroll after rezising/leaving full screen   |                     |                |
| <b>Description:</b> | The auto scroll features is very useful. The user does not need to scroll down manually. Unfortunately this is not continued after a window is rezised to a smaller window or after leaving full screen. I would be nice if Smuxi would automatically check whether it was in auto scroll mode and continuing this. |                     |                |
