| **Subject:** | Automatically switch to window when double-clicking a nick | | |
| **Description:** | I want Smuxi to automatically switch to window when double-clicking a nick (instead of just opening the window and keep viewing the current one). Or the best would be an option to turn this on/off, depending on what the other users want. | | |

I implemented this feature this week so Smuxi now jumps to the private chat (query window) if you activate an user in a group chat (channel). Right now it's not possible to do this for new windows as Smuxi can't tell if it was a user requested operation or a peer requested operation, the ticket #662 deals with that case though so I am closing this one.
