Smuxi Issues [FROZEN ARCHIVE] - Bug # 682: Duplicate query windows from the same user

Status:	New	**Priority:**	Normal
Author:	Patrick M	**Category:**	Engine IRC
Created:	01/25/2012	**Assigned to:**	
Updated:	01/27/2012	**Due date:**	
Complexity:	Medium		
Found in Version:			
Subject:	Duplicate query windows from the same user		
Description:	Did a search on the topic but couldn't find anything related therefore I am making a new ticket.		

How to reproduce:

Say I am chatting with user *userA* in private and suddenly he decides to change his name to *userB* and sends me another message.
This opens up another query window from *userB* leaving me with a conversation that is split amongst two screens.

The expected behaviour:
userA changes name to *userB* -> query window is updated to *userB* so private messages still go in to the same window.

The solution:
Granted that the user is in at least one common channel smuxi would be able to detect the namechange and update the users nickname accordingly.

Possible problems?
UserA disconnects and *userC* changes his/her name to *userA* and sends a private message -> the old *userA* window is reused for a different user

I agree that Smuxi should do this but right now the protocol of Smuxi does not support renaming a chat, neither the ID nor the name. The protocol will be re-designed around 0.9 or a 1.0 release, which will then support this, see: http://live.gnome.org/Smuxi/Protocol/Zero
