Subject:		Sync command for single chats in low-bandwidth-mode	
Description:		Currently Smuxi only allows to load all chats or load none at all if low bandwidth mode is enabled. It would be cool if Smuxi would allow to load single chat logs by using a command like /sync. The command could trigger the syncing of the current chat or specified chat. This way the user in low bandwidth mode would be able to read a certain log without waiting ages for the syncing of all chats.
