<b>Complexity:</b>	Medium		
<b>Subject:</b>	Make a system for exposing non-essential (internal) configuration choices		
<b>Description:</b>	Some options are not important enough to warrant a place in graphical dialogs, but would still benefit from being settable and not static, code-based choices. Find a way to expose these to advanced users, eg. about:config system in Firefox.

The command is already exposed by:

```
<pre>
/config set Some/Key=Value
/config save
</pre>
```

But it should have an UI IMHO...
