

Smuxi Issues [FROZEN ARCHIVE] - Feature # 727: Indent messages across newlines

Status:	Closed	Priority:	Normal
Author:	Mirco Bauer	Category:	Frontend GNOME
Created:	06/27/2012	Assigned to:	Mirco Bauer
Updated:	06/29/2012	Due date:	
Complexity:	High		
Subject:	Indent messages across newlines		
Description:	If a message is too long to fit into a single line, it will be wrapped to a 2nd line. The issue is that 2nd line doesn't align with the 1st line. Smuxi should align wrapped messages.

[Frontend-GNOME] Indent multi-line messages and events (closes: #727)

History

06/27/2012 11:13 AM - Mirco Bauer

The `Gtk.TextView` has `Gtk.TextTags` which allow to individually set indentation width (see <http://developer.gnome.org/gtk/2.24/GtkTextTag.html#GtkTextTag--indent>). This is important as each message has a different sized "prefix" which is the sender nick usually. The issue is though that the `MessageModel` makes no distinction between the sender prefix and the actually message, so the GNOME frontend doesn't know how to obtain the right indent width from the `MessageModel`.

06/27/2012 11:19 AM - Mirco Bauer

Either the `MessageModel` needs to be extended with an `IdentMessagePart` to hint the frontend or by separating the sender from the message itself. Either way, this would be a breakage of the 0.8 protocol! :(

- Target version set to 0.8.10

06/29/2012 01:07 AM - Mirco Bauer

For now a hack was used to extract the nick from the message (using a regex)
