<b>Subject:</b>	easy join sometimes opens second network tab		
<b>Description:</b>	<p>Situation:</p> <p>manual network configuration named the network: CCC the actual network name after connect (visible in the status bar): tippgicht</p> <p>Smuxi is sometimes is unable to match these names when using the easy join feature (maybe race condition?) The fallback method to host + port seems not to work due to -1 as a parameter.</p> <p>(workaround is renaming the network name in the serer configuration to the actual network name)</p> <pre>18:24:26 &lt;meebey&gt; // check first by network name with fallback to host+port 18:24:26 &lt;meebey&gt; if (!String.IsNullOrEmpty(network) &amp;&amp; 18:24:26 &lt;meebey&gt;     String.Compare(network, linkNetwork, true) == 0)    18:24:27 &lt;meebey&gt;     (String.Compare(host, linkHost, true) == 0 &amp;&amp; 18:24:27 &lt;meebey&gt;     port == linkPort)) { 18:24:28 &lt;meebey&gt; das ist die logik btw 18:24:33 &lt;meebey&gt; in Frontend.OpenChatLink 18:24:56 &lt;meebey&gt; sofern es ein netzwerk gibt vergleicht er das, wenn nicht dann host + port 18:25:18 &lt;heavy&gt; *nicknick* 18:25:32 &lt;meebey&gt; glaube ich weiss auch wieso der fallback nicht geht 18:25:42 &lt;meebey&gt; oben kennt er das protokoll nicht 18:25:45 &lt;meebey&gt; übergibt also keines 18:25:55 &lt;meebey&gt; damit wird port immer falsch sein 18:26:17 &lt;meebey&gt; ah hats schon 18:26:30 &lt;meebey&gt; port -1 (aus dem link) vs port 6667 von der verbindung 18:26:45 &lt;meebey&gt; er darf nur port vergleichen wenn einer angegeben wurde 18:26:54 &lt;meebey&gt; ansonsten muss jeder port passen</pre>
