

Smuxi - Feature # 732: IRC formatting code support, and keyboard shortcuts for same

Status:	New	Priority:	Low
Author:	Ben Kelly	Category:	Frontend GNOME
Created:	07/04/2012	Assigned to:	Mirco Bauer
Updated:	11/26/2013	Due date:	
Complexity:	Low		
Subject:	IRC formatting code support, and keyboard shortcuts for same		
Description:	<p>At present the smuxi frontend only supports entering two formatting codes (bold and underline), and only by bracketing the text in <i>asterisks</i> or <i>underscores</i> - which remain present in the transmitted text! This is convenient, but ugly.</p> <p>Keyboard shortcuts that insert the IRC formatting codes (and nothing else) directly would be nice. This gist[1] lists the commonly recognized formatting codes, their meanings, and their default keybindings in xchat.</p> <p>[1] https://gist.github.com/5d01eba0b9d6714b3c3e</p>		

History

- Category changed from Frontend to Frontend GNOME
- Target version set to 0.9
- Complexity set to Low

08/18/2013 01:40 PM - Mirco Bauer

Stuff on the internet vanishes way too quickly, so here a backup of that paste/gist:

<pre>

FORMAT CHAR HEX BIND NOTES

bold ^B 0x02 c-B

underline ^_ 0x1F c-U because c-_ is hard to type

colour ^C 0x03 c-K c-C already bound to "copy"

clear ^O 0x0F c-O resets all formatting

inverse ^V 0x16 c-R aka "reverse", hence the bind; some clients render this as italic instead

</pre>
