Complexity:	Low	•	
Subject:	IRC formatting code support, and keyboard shortcuts for same		
Description:	At present the smuxi frontend only supports entering two formatting codes (bold and underline), and only by		
	bracketing the text in *asterisks* or _underscores which remain present in the transmitted text! This is		
	convenient, but ugly.		
	Keyboard shortcuts that insert the IRC formatting codes (and nothing else) directly would be nice. This gist[1]		
	lists the commonly recognized formatting codes, their meanings, and their default keybindings in xchat.

### History

### 07/04/2012 05:03 PM - Mirco Bauer

- Category changed from Frontend to Frontend GNOME
- Target version set to 0.9
- Complexity set to Low

# 08/18/2013 01:40 PM - Mirco Bauer

Stuff on the internet vanishes way too quickly, so here a backup of that paste/gist:

FORMAT CHAR HEX BIND NOTES

bold ^B 0x02 c-B

underline ^\_ 0x1F c-U because c-\_ is hard to type

colour ^C 0x03 c-K c-C already bound to "copy"

clear ^O 0x0F c-O resets all formatting

inverse NV 0x16 c-R aka "reverse", hence the bind; some clients render this as italic instead

#### 08/18/2013 01:43 PM - Mirco Bauer

- Target version changed from 0.9 to 0.10

#### 11/26/2013 07:51 PM - Mirco Bauer

- Target version deleted (0.10)
