| Subject: | Right Click Nick's in Channel for same menu as nick list | | |
| Description: | <p>It would be great if I could right click on a nick in channel (i.e. someone that is speaking) and get the same right click menu options as I do when I right click on a nick in the nick list.</p> <p>When sitting in a room with 300+ people, it can be hard to find the person you are talking to in the nick list (or at least an extra step). It would be far easier if you could just right click their name in the channel conversation.</p> | | |
