This issue could be a memory corruption caused by shared Regex instances which are support to be thread-safe. The highlight matching code was refactored from IrcProtocolManager to MessageBuilder in August 2012.

12/24/2012 12:17 AM - Mirco Bauer

Nope, I have to revoke my last statement. The regex were it freezes is a local variable and is not even using a compiled regex. This code should be safe in any case, see: <https://github.com/meebey/smuxi/blob/master/src/Engine/Messages/MessageBuilder.cs#L393>
