Subject:	[UI] Visible indicator for "browser mode"		
Description:	At the moment, the visual indication of "browser mode" is hidden in the "View" menu. It should be place somewhere more visible such as the status bar.

Good point, especially as it completely modifies the way the UI behaves. I will talk with the designer about this.

08/18/2013 01:26 PM - Mirco Bauer

- Category set to Frontend GNOME

08/18/2013 01:26 PM - Mirco Bauer

- Subject changed from Visible indicator for "browser mode" to [UI] Visible indicator for "browser mode"

08/18/2013 01:27 PM - Mirco Bauer

- Tracker changed from Bug to Feature

08/18/2013 01:52 PM - Mirco Bauer

<pre>

13:49:27 <me4oslav> meebey: well, we do it like this. Add a tooltip to explain what it does and add a message box that will popup to say what it does if enabled via F8

13:50:03 <me4oslav> for GTK 3 if the treeview is anything more than a bunch of vertical GTK notebooks we can have it in it

13:50:30 <meebey> me4oslav: only when enabled for the first time?

13:50:44 <meebey> me4oslav: or dialog with "no longer show this" checkbox?

13:50:48 <me4oslav> meebey: with a checkbox "Don't show me this message again"

13:51:05 <me4oslav> that dialaog and the tooltip should suffice for now

13:51:14 <meebey> me4oslav: sounds ok to me, I always wanted built-in hints/help anyhow

13:51:19 <meebey> would be the first of that kind

</pre>
