| Subject: | Twitterizer doesn't support error code 88 "Rate limit exceeded" | | |
| Description: | <p>It thinks it's a server-load problem when it is not. From the log:</p> <p>System.Net.WebException: The remote server returned an error: (404) Not Found. at System.Net.HttpWebRequest.CheckFinalStatus (System.Net.WebAsyncResult result) [0x00000] in <filename unknown>:0 at System.Net.HttpWebRequest.SetResponseData (System.Net.WebConnectionData data) [0x00000] in <filename unknown>:0 2013-11-14 16:25:09,761 [Threadpool worker] ERROR Smuxi.Engine.TwitterProtocolManager - CheckResponse(): RequestUrl: http://api.twitter.com/1.1/statuses/user_timeline.json Result: Unknown Content: {"errors":[{"message":"Rate limit exceeded","code":88}]}</p> <p>It is pretty shit that Twitter returns a 404 for this error, but anyway Twitterizer should try to parse it and throw a RateLimitExceeded() exception.</p> <p>The twitter backend should later probably just notify the user and queue the command for retry, but that's maybe for another bug.</p> | | |
