<b>Complexity:</b>			
<b>Subject:</b> Use the xmpp events from Facebook to show the users status.			
<b>Description:</b> I would think this would be nice the events such as <a href="http://puu.sh/5QNsi.png">http://puu.sh/5QNsi.png</a> to signify that the user is type. To signify the user is typing or replying you can change the name. So if the user is typing there name turn pink or another color.
