Subject:	New (empty) filters invisible - not self explaining		
Description:	When you create a new filter you don't have much feedback. All you see is that a row is selected: !http://i.imgur.com/mrHUtBM.png! And if an empty filter isn't selected it is even invisible, because it has the same colour as the background. It is confusing! Ideas to solve this: a) open a dialog, like other application e.g. alacarte b) fill the cells with placeholders (like placeholders in a html text-input-field[1]) - you know the grey text that disappears when you click on/in the object [1]: input type="text" placeholder="Search for titles or tags"
