

## Smuxi Issues [FROZEN ARCHIVE] - Bug # 969: IOException when starting for the first time while having a migrated .config/smuxi directory

<b>Status:</b>	Rejected	<b>Priority:</b>	Normal
<b>Author:</b>	Andrés G. Aragoneses	<b>Category:</b>	Common
<b>Created:</b>	05/14/2014	<b>Assigned to:</b>	Mirco Bauer
<b>Updated:</b>	05/14/2014	<b>Due date:</b>	
<b>Complexity:</b>	Low		
<b>Found in Version:</b>	0.11~rc5-1		
<b>Subject:</b>	IOException when starting for the first time while having a migrated .config/smuxi directory		
<b>Description:</b>	<p>Steps to reproduce:</p> <ol style="list-style-type: none"><li>1. Happily use Smuxi in an old OS (i.e. Ubuntu 13.04) -&gt; (settings in /home/foo/.config/smuxi).</li><li>2. Install some new OS (in my case Ubuntu 14.04), using the new user /home/foo14/</li><li>3. Install smuxi (apt-get).</li><li>4. Do a symlink from /home/foo14/.config/smuxi to /home/foo/.config/smuxi (adjust permissions et-al).</li><li>5. Run smuxi in foo14's session.</li></ol> <p>Expected results:</p> <p>Should just work(TM) with my previous settings.</p> <p>Current results:</p> <p>Exception Type:</p> <p>System.IO.IOException</p> <p>Exception Message:</p> <p>Cannot create /home/knocte1404/.config/smuxi because a file with the same name already exists.</p> <p>Exception StackTrace:</p> <pre>at System.IO.Directory.CreateDirectory (System.String path) [0x00000] in &lt;filename unknown&gt;:0 at Smuxi.Engine.Config..ctor () [0x00045] in /build/buildd/smuxi-0.11~rc5/src/Engine/Config/Config.cs:92     at Smuxi.Engine.FrontendConfig..ctor (System.String uiName) [0x00000] in /build/buildd/smuxi-0.11~rc5/src/Engine/Config/FrontendConfig.cs:59     at (wrapper remoting-invoke-with-check) Smuxi.Engine.FrontendConfig..ctor (string)     at Smuxi.Frontend.Gnome.Frontend.Init (System.String[] args) [0x000a9] in /build/buildd/smuxi-0.11~rc5/src/Frontend-GNOME/Frontend.cs:210     at Smuxi.Frontend.Gnome.MainClass.Main (System.String[] args) [0x000b2] in /build/buildd/smuxi-0.11~rc5/src/Frontend-GNOME/Main.cs:75</pre>
