Subject:	Make Crtrl-Shift-+/- do font resizing		
Description:	The keyboard commands Crtrl-Shift-+/- resize the font in Chromium, Konsole and some PDF viewers. It would be nice if Smuxi supported it too. While this is more important in a web browser, which can receive pages with fonts in arbitrary sizes, it would be at least modestly useful in an IRC client. Currently, changing the font is a bit of a business. See, for example, http://unix.stackexchange.com/q/151955/4671 Regards, Faheem
