| Subject: DatabaseFileLockedException thrown in Db4oMessageBuffer.InitDatabase() | | | |
| Description: [2014-11-16 21:17:17] -!- Öffnen des Gesprächverlaufs zum Schreiben fehlgeschlagen. Ihr Gesprächsverlauf wird nicht vorgehalten. Grund: Sharing violation on path /home/martin/.local/share/smuxi/buffers/martin/xmpp/jabber.ccc.de/jabber.ccc.de.db4o [2014-11-16 21:17:17] -!- Öffnen des Gesprächverlaufs zum Schreiben fehlgeschlagen. Ihr Gesprächsverlauf wird nicht vorgehalten. Grund: Sharing violation on path /home/martin/.local/share/smuxi/buffers/martin/xmpp/jabber.ccc.de/contacts.db4o | | | |
| I'm using 2 accounts at jabber.ccc.de, maybe this causing the issue? | | | |

Frontend: GNOME 0.11.0.0
Engine: 0.11.0.0

History

11/17/2014 12:17 PM - Mirco Bauer

The experimental db4o backend was never production ready. You should upgrade to the sqlite backend of Smuxi 0.12-dev.

11/17/2014 12:18 PM - Mirco Bauer

Smuxi can deal with multiple connections to the same server/network but not with the on-disk chat history backed by db4o, the sqlite backend supports multiple reader and writers.

11/17/2014 12:20 PM - Mirco Bauer

- Subject changed from Öffnen des Gesprächverlaufs zum Schreiben fehlgeschlagen to DatabaseFileLockedException thrown in Db4oMessageBuffer.InitDatabase
- Category set to Engine

sqlite <-> db4o: So, does this change, when I switch in the settings from "Volatil" to "Persistent" ?

I couldn't find a documentation, what's exactly the difference between the two settings. Also the different buffer line settings should be explained somewhere more detailed. It's a little bit confusing at the first view...

Yes Persistent uses db4o as backend and that threw the exceptions you have reported.

I agree, I sometimes also forget what each setting means related to the buffers :-D

Smuxi's message buffers are now documented: <https://smuxi.im/faq/usage/message-buffer-settings/>
